Compact Tractor 10 Year Warranty

Keep your John Deere utility tractor running smooth and working hard with our exclusive ***10 Year Limited Warranty.***

John Deere equipment comes with one of the industry's leading warranties but SNPartners has made it even better on all new John Deere 1-4 series and 5E (3-cylinder) tractors. The 10 Year Limited Warranty will provide an additional 48 months of coverage on 1-4 series tractors and an additional 60 months on 5E (3 cylinder) tractors, for a total of 120 months (when combined with John Deere's manufacturer Powertrain Warranty) or 2000 hours (whichever comes first).

- 10 Year or 2000 total hours powertrain and engine warranty included with purchase of tractor.
- The customer must complete all recommended maintenance outlined in the operators manual at their own cost.
- Customer must keep written receipts for services completed somewhere other than a SNPartners location, or receipts for the parts purchased to complete the services themselves.
- A \$250 deductible must be paid prior to any warranty work is performed after the standard John Deere warranty expires.
- Customer is responsible for transportation of warranty work to a SNPartners location.
- 10-year warranty is not transferable to secondary owners.

Eligible Equipment:

New John Deere 1 – 4 Series Tractors

New John Deere 5E 3-Cylinder Tractors

CUT, Turf, Gator Packages

COMPACT UTILITY TRACTOR SERVICE PACKAGES*

1 Series Tractors	\$305
2000, 2R, 3000, 4000 Series Tractors	\$345
3D, 3E, 3R, 4R, 4M Series Tractors	\$385

5 SERIES UTILITY TRACTOR SERVICE PACKAGES*

5D, 5E, 5M, 5R, 5000 Series Tractors	\$495
--	--------------

SERVICE INCLUDES

- Replace primary air filter (1-4 Series Tractors)
- Check primary air filter (5 Series Tractors)
- Change engine oil and filters
- Test air filter restriction indicator
- Check antifreeze condition and freezing point
- Inspect radiator hoses and clamps
- Pressure test cooling system
- Replace fuel filter and check for water in system
- Check fuel lines for cracks and weathering
- Check battery fluid level and clean cables
- Check hydraulic and transmission oil
- Adjust fan belt and check pulleys
- Check MFWD drive fluid levels (if equipped)
- Grease machine
- Pressure wash tractor (in shop only)

RESIDENTIAL & COMMERCIAL MOWER SERVICE PACKAGES*

Commercial Walk Behinds WG, WH, WHP.....	\$205
S, D, E, L, LA, LT, LX, 100, 200, S240, X300 Z200, Z300, Z400, Z500, Z600, Z700, EZTrack Mowers.....	\$275

SERVICE INCLUDES

- Change engine oil and filters
- Change spark plug
- Change air filter
- Check engine coolant
- Clean engine, battery, radiator and mower
- Check tire pressure and adjust deck level
- Check transmission oil level
- Lubricate tractor and mower
- Sharpen blades
- Stabilize fuel for storage
- Check belts and mower adjustments
- Check safety system
- Pressure wash mower (in shop only)

GATOR SERVICE PACKAGES*

4x2, TS, TX, CX.....	\$225
6x4, TH, HPX, XUV, S550, S560, RSX, and Diesel Gators.....	\$295

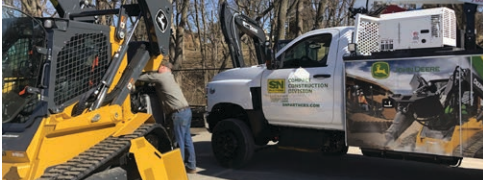

SERVICE INCLUDES

- Change engine oil and filter
- Replace spark plugs
- Replace air filters
- Replace fuel filter
- Check fluid levels
- Check belts
- Check drive clutch
- Adjust drive chains (6x4)
- Check tire pressure
- Grease machine
- Check brakes
- Check cab air filter (if equipped)
- Pressure wash (in shop only)

WHEEL LOADERS

Service Package #1

- Change engine oil and filter
- Replace fuel filters
- Replace hydraulic oil filter
- Check all fluid levels
- Test coolant
- Check belt tension
- Lubricate all grease fittings
- Replace cab air filter
- Check intake hoses & connections
- Replace primary & secondary air filters
- Wash machine

\$495
Labor Only

Service Package #2

- Replace hydraulic oil and filter
- Replace hydraulic tank breather
- Drain and refill final drive oil
- Drain and refill front and rear axle oil
- Drain and refill gearcase oil
- Check service brake oil level
- Check and adjust engine valve lash
- Lubricate all grease fittings
- Wash machine

BALER OR MOCO INSPECTION \$235

BALER SERVICE SPECIAL \$495 MOCO SERVICE SPECIAL \$495

Service Special Includes

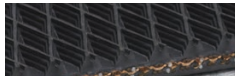

- Check slip clutch and driveline
- Change oil and filter in twine circuit
- Check and adjust all chains and sprockets
- Check oil in gearbox
- Check all belts and laces, and install new pins
- Check and adjust monitor and sensors
- Check pickup system
- Check all rolls and bearings
- Repack wheel bearings
- Grease and lube chains
- Check all cylinders
- Check net wrap and twine systems
- Inspect safety shields and decals

Service Special Includes

- Check driveline and slip clutch
- Check gearbox oil levels
- Check cutterbar bearings and change oil in bar
- Check skid shoe wear
- Change knives and check accelerator wear
- Check roll/impeller bearings
- Repack wheel bearings
- Grease
- Check all cylinders and hoses
- Check swathboard adjustment for proper operation
- Check shields and safety decals

Carry-In Baler Belt Repair \$125

(2 Clips and 1 Pin Included)

Baler Belt Resizing \$1515 (4ft)

(Parts & Labor)

Includes:

- Remove all 8 belts
- Resize each belt
- Install new splices
- Re-install with new pins
- Run machine to check belt tracking
- 20 splices—10 pins—8ft baler belt (4ft)
- 24 splices—12 pins—8ft baler belt (5ft)

BE32310

Corn Cob Filler Plates

Keep threshed corncobs moving smoothly into the baler without snags. Available for MegaWide pickups, these plates will improve pickup tooth and rotor tine reliability.

\$853

BE32257

Corn Stalk Compression Rack

Feed tough, abrasive cornstalk windrows into your baler more easily while protecting your equipment. This hardworking rack contains a solid steel shaft heavy enough to help compact stalks and leaves against the pickup.

\$662

BE31105

Crop Deflector Kit

Keep crop from accumulating in the lower gate area and preventing the gate from closing as the bale is ejecting

\$1999

BE33117

Net Lift Assist & Net Lighting

Work smarter, not harder. Net Lift Assist and Net Lighting are available for all 7/8/9 and 0 Series Round Balers. It's easy bolt-on installation provides an effortless net wrap loading experience day or night.

\$256

BE33118

\$2909

BE32698

Baler Wear Parts Box

Including the most common wear parts for a John Deere Round or Large Square Baler, you'll be covered when those minor maintenance needs arise. The durable container easily stores in the back of your truck or shop, and we've included a magnetic parts list to help you keep track of what you've used.

\$3464

BE32141

\$2419

BE32101

Side Sheet Enhancement

ADD MORE muscle for punishing field conditions. With this kit, you'll get a solid way to protect your round baler where you need it most – inside the walls. Made with rugged carbon-manganese steel that withstands extremely abrasive crop and field conditions, it delivers a dramatic increase in your baler's service life.

\$2388

BE32442

\$2636

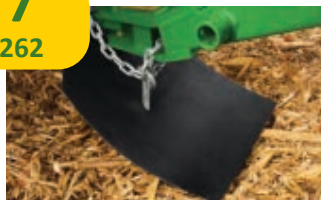

BE32443

Silage Special Kit

Prevent wet hay from wrapping around the starter roll, traveling up the belts, and building up. This kit features a staggered rollauger kit, a starter-roll-scraper knife, and a screen.

\$77

BE32262

Drawbar Shield

Save time by preventing window bunching that can occur when your drawbar contacts heavy windows.

\$1171

BE23828

\$1306

BE23829

High Moisture Kit

Improve performance in wet, sticky crops. This kit includes a starter-roll-scraper knife to keep your productivity high.

ExactEmerge™ Wear Components

Service/Inspection	As needed	50 hrs	100 hrs	Pre-Season
Seed Bowl Corn Bowl - A92777 Soybean Bowl - A92778			X	
Meter Housing - AA98668				X
Meter Wear Pads - A107427		X		
Seed Guide - A95817				
Agitation/Smooth Strip Corn Strip - AA92875 Soybean Strip - AA83215			X	
Meter Housing Bearing - AA86138	X			
Double Eliminator - AA86138				X
Knockout Wheel - AA88629			X	
Dome Seal - A106079	X			
BrushBelt™ Conditioner - A95831			X	
BrushBelt™ Gearbox - AA94227			X	X
BrushBelt™ - A98765	X			X
Seed Sensor - PH85244204	X			X

Seed Bowl: Grooves along the seed bowl lip do not cause meter performance issues.

When to Replace: Inspect every 100 hours or annually. Replace if wear from contact with meter housing and wear pads reaches seed holes.

Meter Housing: Grooves in the housing do not cause performance or durability issues.

When to Replace: Inspect annually. Timely replacement of meter wear pads helps to avoid housing wear.

Ceramic Meter Wear Pads: Meter wear pads will experience wear under normal conditions. Proper replacement of wear pads helps prevent meter housing wear. Ceramic Wear pads should be torqued to 2.9 NM (25 in*lbs)

When to Replace: Inspect every 50 hours. There is a wear indicator on the pad. When the wear indicator is not visible it needs to be replaced. Wear pads may be moved from top to bottom, if non-uniform wear occurs, for longer life.

ExactEmerge™ Wear Components

BrushBelt™ Conditioner:

When to Replace: Inspect every 100 hours. Replacement is suggested if conditioner has worn to the point where no contact is made with bristles.

BrushBelt Gearbox:

When to Replace: Inspect 100 hours or annually. With the gearbox removed from cartridge, rotate by hand checking for any noticeable “catching” to occur, suggesting a dry bearing.

Inner Double Eliminator

Double Eliminator:

Designed lengths of components
 Inner DE: 20.5 mm length from end of boss.
 Outer DE: 10.5mm

When to Replace: Inspect annually

Inner DE: If tines are worn down, measure < 17.5mm.

Outer DE: If tines are worn down, measure < 8mm

Tines swept in direction of bowl rotation do not need replaced, this is as designed.

Replacement suggested when measurements are less than dimension shown. Measurement for the outer DE should be taken perpendicular to the base of the DE mounting to the tip of the tine, NOT the true length of tine.

Outer Double Eliminator

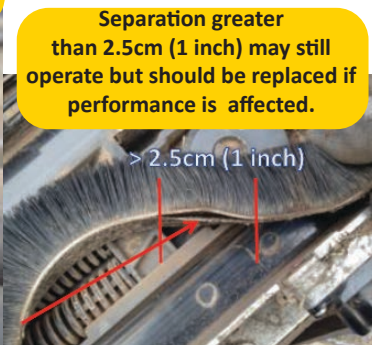

BrushBelt:

Bent over bristles should not be a cause for concern or replacement. Running the brush will return bristles to proper position. This may be seen on machine arrival from the factory.

When to Replace: Inspect before and after season. Replace when large areas of bristles are missing, or if bristles have worn too short, causing performance degradation. Replace if brush backing has cracks, breaks, or is starting to unravel.

Replace belt if one side has been worn as shown

Separation greater than 2.5cm (1 inch) may still operate but should be replaced if performance is affected.

Replace if belt backing has separated

Crack across brush strands may still operate, but should be replaced when time allows or performance degrades

ExactEmerge™ Wear Components

Seed Guide: Evidence of wear from contact with the seed bowl does not cause performance issues.

When to Replace: Inspect annually. If surface is chipped or damaged in area where seed transitions to BrushBelt™, replacement is suggested. Ensure that soft sided piece is not damaged or worn.

Corn Agitation Strip: Individual missing tines will not greatly affect component performance.

When to Replace: Inspect every 100 hours or annually. If groups of consecutive tines are missing or extremities are peeled back, performance may be reduced and replacement is suggested. If attachment clip on back side of meter is broken or damaged, replace.

Knockout Wheel: Knockout wheel tines should engage the seed holes fully

When to Replace: Inspect 100 hours or annually. Replace if wheel tines are worn down, missing or do not engage seed bowl holes adequately. Verify that bearing surface is clean and tine head spins freely.

Dome Seal: Verify seals are in operating condition prior to spring planting season. Verify that graphite has been applied to seed bowl and store properly per the Operator's Manual

When to Replace: Inspect as needed. Check for unthreaded, torn, or flipped seals.

Seed Sensor:

When to Replace: Inspect as needed and at end of season. Broken or damaged glass face. Cover can be replaced without complete sensor replacement.

Meter Bearing:

Movement found in the bearing in relationship to the housing can affect performance.

When to Replace: As needed. Inspect if you have noticed a change in bowl/hub tightness. If there has been measureable movement of the bearing within the housing, replacement is needed.

Precision Upgrade Kits

Adopt the latest technologies without purchasing a different machine. It's a great way to increase the value of your current machine and see a faster return on investment. Talk to one of our SNPartners Sales Professionals to learn more!

ExactEmerge™

Compatibility:

SEED+™ GRAPHITE

A VERDESIAN NUE SOLUTION®

\$29

Per Pound

SEED+GRAPHITE GROWER BENEFITS

- Three key components go above and beyond conventional seed lubricants:
 - **Talc + Graphite** to improve seed flowability and reduce bridging
 - **Nutrients** to support seedling emergence and a robust start
 - **Biostimulants and metabolites** to improve crop tolerance to abiotic stress and improve photosynthetic activity
- Fosters germination and early season root & shoot growth
- Helps crop tolerance against heat, cold, drought, excess moisture and UV stressors
- Consistent proven performance of SEED+ technology across more than 300 trials has shown a 10% yield increase on average across all treated crops
- Apply like any other seed lubricant – in the tender or directly in the planter box.

Talc + Graphite

for efficiency at planting

Improves flowability and reduces bridging
Dries seed and reduces static electricity

Micronutrients

to support seedling emergence and a robust start

Improves emergence and seedling vigor
Supports season-long plant development

Biostimulants and Metabolites

To set crops up for season-long success

Mitigates abiotic stressors
Fosters photosynthetic activity and carbohydrate production

Parts pricing is subject to change

Tractor Maintenance

6, 7, 8 and 9 Series Tractors

If the customer brings the machine in and picks it up, a \$125 credit will be applied to all inspection repairs.

- Change fuel filter
- Change air filter
- Change transmission and hydraulic filters
- Top off with oil

Package 3 **\$465**
Labor Only

- Inspection
- Change engine oil and filter
- Change fuel filter
- Change air filter
- Change transmission and hydraulic filters
- Top off with oil

Did you know?

The engine damper reduces crankshaft torsional vibrations, which results in quieter operation, reduced crankshaft stress, reduced gear wear, reduced water pump wear, longer belt life, and longer front-drive accessory life. Deere recommends replacing engine and transmission dampers at **4500 hours** on 6, 7, 8 and 9 Series Tractors.

Ask your Service Manager about pricing!

Beacon Lights

Make yourself & your tractor more visible to others around you with a rotating, high-intensity beacon light. For your convenience, a cab-mounted rocker switch turns the light on and off.

Do you hear a grinding or clicking noise coming from the Vari-Cool™ Fan Drive?

- For tractors equipped with a 9.0L or 13.5L engine, fan drive belt should be inspected every 500 hours or annually, whichever comes first.
- For tractors equipped with a 9.0L engine, belt should be replaced if belt is worn past 29mm.
- For tractors equipped with a 13.5L engine, belt should be replaced if belt is worn past 36mm.

Parts Warranty 12 months, if installed by the dealer

Tractor Parts

R Series Cab Bracket Kit

The R series cab bracket kit is available for mounting monitors, phones, displays, and mounts to existing holes inside the cab. Fits 7–9R Series tractor cabs.

RE317435		\$171.60
BRE10574	Fits MY20-Current 7R, 8R/8RT/8RX with new cab	\$185.90

Short Vertical Mounting Rail

This rail kit also includes all the hardware to mount the rail in up to 5 vertical locations, using existing threaded bosses at the A and C posts inside the cab. This rail can be used to mount tablets, cell phones, cup holders, or displays. Fits: 7020 – 7R, 8020 – 8R/8RT, 9020 – 9R/9RT/9RX, and MY2020 7R and 8R/8RT/8RX (with new cab).

BRE10575		\$102.30
-----------------	--	-----------------

Mounting Bracket Kit – Long Bar and Tray Kits

The accessory mounting bracket with optional tray kit provides a low-cost solution to all your mounting needs in the cab. Fits 7020, 7030, 8010–8030, 9020, and 9030 Series.

BRE10141	Bracket Kit	\$89.10
BRE10142	Tray Kit	\$63.80

CommandARM Bracket

The CommandARM bracket offers a safe and convenient way to mount a mobile device or tablet to the CommandARM on 6R–9R FT4 tractors. Includes bracket and hardware only.

BRE10147		\$56.10
BRE10501	Fits MY20-Current 7R, 8R/8RT/8RX with new cab	\$55.00

Cell Phone Bracket Kit

The RAM X-Grip® bracket's four-leg design offers great holding power, without covering your phone's screen.

BRE10015		\$82.50
-----------------	--	----------------

RAM Tablet Mount Kit

This kit's high-strength design keeps your tablet secure, without restricting access to audio jacks or USB or other ports.

BRE10255		\$113.30
-----------------	--	-----------------

Accessory Mounting Bracket Kit

Mount, adjust, and position key controls and displays within the cab for maximum accessibility without compromising visibility. The John Deere design can be used in multiple configurations and tailored to the specific machine and task.

RE343680		\$55.81
-----------------	--	----------------

Greenstar™ Display Bracket

Corner post cab bracket for mounting Greenstar display.

BPF12124	Single Display Bracket Mount	\$125.00
PF90430	Dual Display Adapter Mounting	\$161.16

Precision Support

JDLink — Connect with the entire fleet for seamless communication!

JDLink Modems connects your machines for fast data transfer and brings connectivity to your entire fleet regardless of equipment brand or age. Begin to stream machine and field data to your John Deere Operations Center account, gain remote support from your dealer, as well as track and document agronomic data by pairing a compatible John Deere display.

Check out some of the options to get your fleet connected!

R Modem

JDLink R Modem is easy drop in solution for upgrading existing but outdated JDLink systems.

- Modem upgrade recommended option for current 2G and 3G MTG
- High gain antenna is needed for machine sync
- Ability to see machine information, wireless data transfer, RDA, etc.
- Not easily compatible with competitive equipment

M Modem

The JDLink M Modem is an easy-to-install, low-lifetime-cost product that brings connectivity to compatible machines in your fleet - regardless of equipment brand or age*. The M Modem seamlessly delivers valuable location, machine performance, and agronomic data (John Deere Display required) to the John Deere Operations Center where you can manage your operation, keep your machines running at peak performance and share data with agronomists, dealers, and others if you choose.

The M modem is an option for you if:

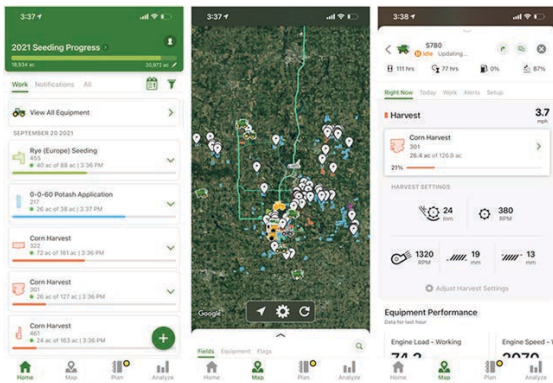

- You run older machines that didn't come with built-in modem
- You own a mixed fleet and want all data to go into Operations Center
- You rent smaller tractors that didn't come with built-in modem

Mobile MTG

Versatility for moving JDLink connection easily between machines, grab a Mobile MTG and add it to your needed machine when you need it.

- Built by SNP
- Primary Agronomic Data Transfer (Data Sync, Shared Coverage, RDA)
- Easily transferrable between machines for constant communication
- Quick and simple install process

Stay up to date in near real time with the John Deere Operations Center Mobile APP!

Keep connected with your fleet to monitor progress throughout the season. Available on Apple or Android.

Oil & Filters / Diesel Exhaust Fluid (DEF) / Andy Clean

12% OFF FILTERS
10% OFF OIL
FEBRUARY & AUGUST 2024

Why Bulk Oil?

- More economical than buying individual drums or pails
- Eliminates waste
- Dispenses oil to the last drop
- On-site delivery and disposal
- Save time and expense
